Cont

~~an application for collecting the parsed resume data and storing the parsed resume data in a database, comprising means for tracking the parsed resume data stored in the database and utilizing the parsed resume data for increasing tracking efficiency.~~

B2

8. (Amended) A service provider node comprising:

- ~~a client program for accessing web, gopher and other Internet sites that allows users to read documents and navigate between the documents stored in at least one resume warehouse;~~
- ~~a communications link with the at least one resume warehouse;~~
- ~~a communications link with at least one client;~~
- ~~an application for parsing job applicant data from the at least one resume warehouse and placing parsed resume data into a template with at least one job applicant field; and~~
- ~~an application for collecting the parsed resume data and storing the parsed resume data in a database, comprising means for tracking the parsed resume data stored in the database and utilizing the parsed data for increasing tracking efficiency.~~

5/27 >

9. (Amended) A method for resume storage and retrieval from multiple resume warehouses comprising the steps of:

- ~~establishing a communications link between a service provider and at least one client;~~
- ~~providing a client program for accessing web, gopher and other Internet sites that allows users to read documents and navigate between the documents stored in at least one resume warehouse;~~
- ~~establishing a communications link with at least one resume warehouse;~~
- ~~parsing job applicant data from the at least one resume warehouses and placing parsed resume data into a template with at least one job applicant field; and~~

MAY 12 2013 11:56 FR PIPER RODNICK LLP 1 2022232085 10 11624#30034#6#17 P.04/08

collecting the parsed resume data and storing the parsed resume data in a database,  
whereby the parsed resume data stored in the database is utilized for increasing tracking  
efficiency.

B2

10. (Amended) A method for resume storage and retrieval from multiple resume  
warehouses comprising the steps of:

- establishing a communications link between a service provider and at least one client;
- providing a client program for accessing web, gopher and other Internet sites that allows  
users to read documents and navigate between the documents stored in a plurality of resume  
warehouses;
- establishing communications link with the plurality of resume warehouses;
- parsing job applicant data from the plurality of resume warehouses and placing parsed  
resume data into a template with at least one job applicant field; and
- collecting the parsed resume data and storing the parsed resume data in a database,  
whereby the parsed resume data stored in the database is utilized for increasing tracking  
efficiency.

Please add the following new claims:

B3

21. (New) A method for job applicant data storage and retrieval from at least one job  
applicant data warehouse, comprising:

- accessing at least one Internet site that allows users to read documents and navigate  
between the documents stored in the at least one job applicant warehouse;
- parsing job applicant data from the at least one job applicant data warehouse and placing  
the parsed job applicant data into at least one template with at least one job applicant field; and

MAY 02 2003 11:56 FR PIPER RUDNICK LLP 1 2022232085 TO 11624#30034#8#17 P.05/08

storing the at least one template in a database, whereby the parsed resume data is utilized for increasing tracking efficiency.

22. (New) A computer program product comprising a computer usable medium having control logic stored therein for causing a computer to store and retrieve job applicant data, the control logic comprising:

first computer readable program means for accessing at least one Internet site that allows users to read documents and navigate between the documents stored in at least one job applicant warehouse;

second computer readable program means for parsing job applicant data from the at least one job applicant data warehouse and placing the parsed job applicant data into at least one template with at least one job applicant field; and

third computer readable program means for storing the at least one template in a database, whereby the parsed resume data is utilized for increasing tracking efficiency.

Respectfully submitted,
